

# Technology Products & Technology Services

Falcon Complete™ revolutionizes endpoint security by providing all of the components required for a mature endpoint security posture, from the initial setup and day-to-day operations to the prevention and detection of threats, all the way to full incident handling, including immediate remote remediation and recovery.

CrowdStrike Falcon Complete™ is the only endpoint security solution with built-in proactive threat hunting and remote remediation, backed by a team of security experts that serves as your force multiplier, 24/7.

## Client Benefit:

- Falcon Complete™ provides all the technologies and services required to instantly implement and continuously run a mature endpoint security program
- Protects against all types of attacks
- Combines the best prevention technologies
- Frees your IT and security teams from daily, time-consuming endpoint security tasks
- Reduces risk with immediate remote remediation of incidents
- Falcon Complete™ dramatically reduces the risks of a serious breach. In addition, the Falcon team assists with guidance and expertise to help your teams with any security concerns they might have
- Immediate time-to-value: easy deployment, immediately operational, zero impact on performance

# Technology Services

## CrowdStrike—Adversary Emulation (Red Team Exercises)

CrowdStrike's premier Red Team service offering helps organizations gauge their readiness to withstand an attack from the most advanced adversaries. During this test, experienced consultants mimic current attacker techniques in an attempt to gain access to an organization's network and compromise specific assets.

### Client Benefit:

- Understand how a cyber attack on an organization would manifest throughout the network environment
- Determine what a malicious actor can do with access to the network environment
- Measure how effective your current security posture is at preventing, detecting and responding to a targeted attack
- Receive documented proof how a targeted attacker could penetrate a network and compromise confidential information. In addition, document defensive capabilities that succeeded in preventing the simulated attacks.
